—The situation in the Trinidad, Colorado coal fields during the last week has been as important in the way as the Mexican situation. Some forty or fifty lives have been lost in the strike between the miners and the coal companies. The strike has not been nearly settled. Both the governor of Colorado and the president of the Federal troops. The state troops do not like the idea of fighting the miners, and the miners themselves would rather not fight the state troops. President Wilson on yesterday, made a personal appeal to John D. Rockefeller, a large owner of the mines to do what he could to settle the trouble and Mr. Rockefeller turned the matter over to his son, John D. Jr. The president on yesterday sent Congressman Martin D. Foster, chairman of the house committee on Mines and Mining to talk over the situation with John D. Jr., but John D. Jr. told him that he saw no way to arbitrate the matter.

—The Spartanburg jury in the case of Clyde Clement and Laura Fieda Pendleton on yesterday brought in a verdict of not guilty as to Laura Fieda Pendleton and guilty as to Clement. The jury was out only about two hours. Miss Pendleton was released and Clement was taken back to jail. His sentence will be life imprisonment.

Pyrene Fire Extinguisher
The Pyrene Fire Extinguisher is the most effective device that has ever been invented for extinguishing fire. It was perfected in 1907. A Pyrene Extinguisher is worth more than a well equipped fire department within five minutes after a fire starts—it will extinguish the fire and does no damage. There should be at least one in every store in York county. It is always ready for use, and you will always know where to find it. If you have one in your store or place of business, if you need it. The price of the Extinguisher is \$7.50. I am prepared to allow 15 per cent reduction on insurance on all automobiles equipped with a Pyrene Extinguisher or 5 per cent reduction on country stores that have one. I am sole agent for this section, but owing to the fact that the profit to the agent is very small, I do not expect to make a systematic canvass. You can get one or more by seeing me. You may receive one, but you will not have it and not get it, you would gladly pay several times its cost to have the use of it. See me about it today.

This whole community has been helped by the establishment of this Bank.
There were already people in this town and community who knew the advantages of banking, and who had to go elsewhere for facilities. That was before this bank was established. Upon the establishment of this Bank, most of those who knew banking came with us, and since then, many others have come.
All who have come have benefited thereby, and we have been benefited also.
But the Bank cannot do most for itself or the town or the community until it has the patronage of all who would find it profitable to give us their business.
We want more deposit accounts.

Too many people make the mistake of judging quality by the price. That is not the safe rule. The right way is to take all goods on their real merits. We sell Superior Qualities at Reasonably Low Prices, and we ask nothing better than that discriminating buyers make careful comparisons and decide in accordance with the facts. If we give better quality for less money than does the other fellow, don't we reduce the High Cost of Living? Then come and see if we are not doing that very thing.
